Nguyen Ngoc Khiet

Backend & Full-stack Developer Intern

Ho Chi Minh City 0833 942 069 khietnguyenngoc.ttma@gmail.com
linkedin.com/in/khietnguyenngoc66 github.com/khietnn

EDUCATION

FPT University, HCMC

B.Sc. Software Engineering
Java track, 2024 – present

GPA 7.6 / 10

SKILLS

Languages
Java, TypeScript, JavaScript, SQL, C

Backend
Spring Boot, Spring Security (JWT), JPA / Hibernate, RESTful APIs, Thymeleaf, Servlet/JSP

Frontend
React, Vite, Tailwind CSS, i18next, PWA

Databases
PostgreSQL, SQL Server, Supabase, IndexedDB

Testing & tools
JUnit, Testcontainers, Vitest, Playwright, Git, Docker Compose

CERTIFICATIONS

Java Programming (Duke)

OOP & Data Structures in Java (UC San Diego)

Software Dev. Lifecycle (U. of Minnesota)

Software Engineering (UML, Testing, Design)

Generative AI in Software Dev. (Amazon)

UX Research & Design (U. of Michigan)

Web Design for Everybody (U. of Michigan)

All via Coursera, 2025–2026

LANGUAGES

Vietnamese	Native
English	Professional working
Japanese	Elementary

SUMMARY

Software Engineering student at FPT University who builds features end to end, from Spring Boot APIs to React interfaces. Top contributor on a 5-person capstone team, co-author of a paper accepted at EAI FISAT 2026, and currently building a front-desk app for a family-owned hotel. Looking for a Backend or Full-stack internship for Spring 2027.

RESEARCH

An Efficient Unigram-Based Method for Functional and Non-Functional Requirement Classification
Co-authored with lecturer Đỗ Phúc Thịnh. Accepted at EAI FISAT 2026.

PROJECTS

RaceHorse Transport System

Sep 2026 – now

Team capstone (SWP391). Full-stack developer and top contributor with about 250 commits. GitHub

- Built the frontend architecture (React + TypeScript): project structure, 8 back-office pages, shared order state management
- Integrated the UI with the Spring Boot REST API; added code splitting and a CI pipeline (tests, lint, build on every PR)
- Implemented truck routing with Valhalla (Vietnam, Cambodia, Laos): rest-stop planning, overnight-stay rules, route-based pricing
- OTP email verification (Brevo API), VI/EN internationalization (i18next), Playwright E2E tests

Java 21, Spring Boot, JWT, PostgreSQL, React 19, TypeScript, Docker

Mỹ An Hotel — Real client

Oct 2026 – now

Client project: front-desk management app for a family-owned hotel (17 rooms). Solo developer, preparing for deployment.

- Offline-first PWA: room status, bookings, multi-room reservations, room transfers, manager approval workflow
- Local persistence in IndexedDB with cloud synchronization on reconnect; unit tests with Vitest
- Elicited requirements directly from front-desk staff

React 19, TypeScript, Vite PWA, IndexedDB (Dexie)

Thegioihoatuoi

Oct 2026

Flower e-commerce website. Solo project with a storefront and admin area.

- Product catalogue, shopping cart, checkout and payment, order tracking, custom orders, admin dashboard
- Role-based access control (RBAC) with Spring Security; 13-table relational schema on SQL Server
- 30+ JUnit test classes running on an in-memory H2 database

Java 21, Spring Boot, Thymeleaf, JPA, SQL Server, JUnit
